

Machined Components for Optronics

OFP offers a wide range of packaging components for optical and micro-electronic applications. All of our products are machined to a high precision; we also provide rapid prototyping and fast-scaling to mass production. Many value added services are available such as hermetic sealing of pins and post-machining assembly.

Materials

- Kovar
- Brass
- CuW Alloys
- CuNi Alloys
- Aluminum
- Nimonic Alloys
- Alternative Alloys

Post Machining Services

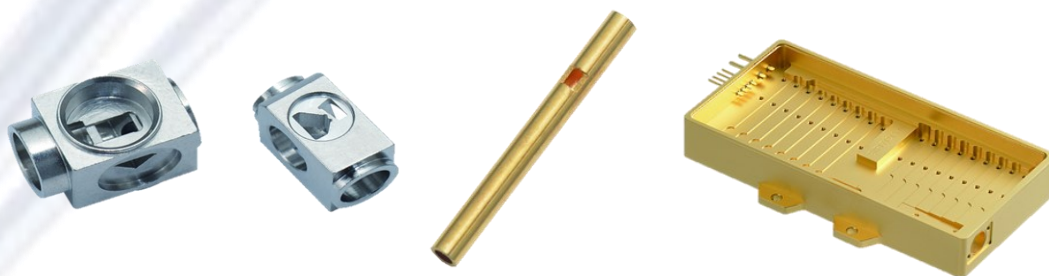

- Added Windows
- RF Out Connectors
- Plating
- Polishing
- Anodic Oxidation
- Laser Machining
- Partial Plating

Products Types

- Metal Hermetic Packages
- TOSA/ROSA Components
- Hypo-tubes/Feedthrough Tubes
- All-in-one Structures
- Device Mounts/Heat Sinks
- TO Caps
- Lids/Weld Spacers
- Receptacle Components
