Overview

OFP's Mini Adaptors avoid the use of traditional Cable or BTW LC connectors within pluggable modules like transceivers which typically contain pigtailed fibers.

This space saving allows the customer to maximize 'real estate' for other critical opto-electronic hardware and fiber components

Configurations

- Singlemode & Multimode
- UL 94-VO, HB flammability ratings
- EMI/EMF shielding
- Telcordia GR326 qualified
- Supplied as kits and/or with connectorized pigtails for assembly

Options

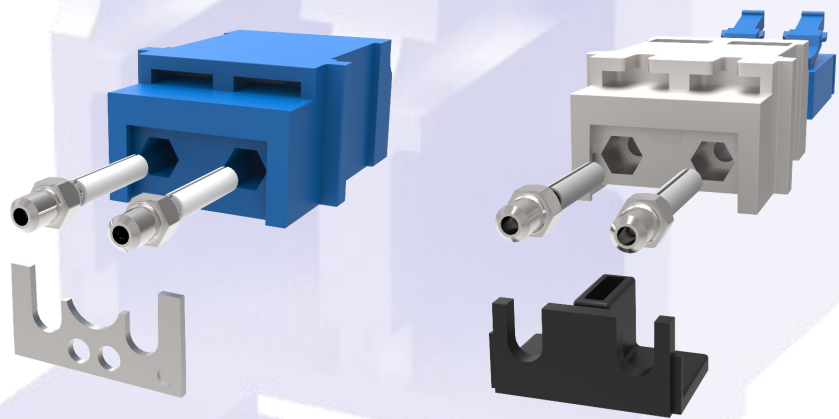

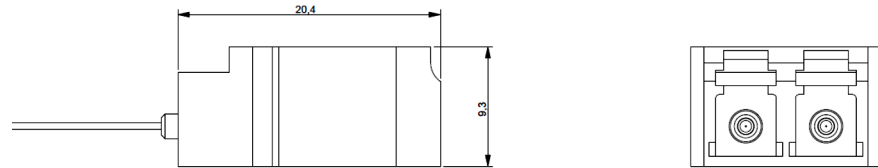

- Polymer choices & colour options
- Die-cast versions
- Various ferrule retentions
- Different flange positions and mounting options
- Customizable to fit client packages
