

Machined Components for Optronics

OFP offers a wide range of packaging components for optical and micro-electronic applications. All of our products are machined to a high precision; we also provide rapid prototyping and fast-scaling to mass production. Many value added services are available such as hermetic sealing of pins and post-machining assembly.

Materials

- Oxygen free copper
- Lead brass
- Aluminium Alloy
- Kovar Alloy
- Hard Alloy

Surface Treatment

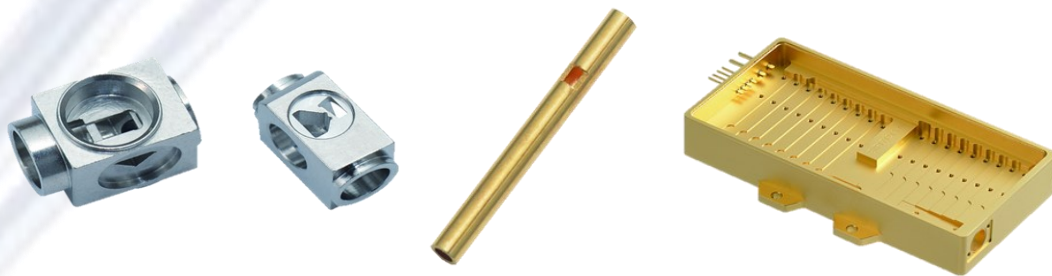

- Polishing
- Sand Blasting
- Plating
- Anodic Oxidation
- Laser
